EVENT PAGE

Description In celebration of Earth Day, Ophelia - the new rooftop cocktail lounge located atop the historic Beekman Tower - will be turning off the lights on the evening of April 22nd and lighting the lounge with only candles to conserve energy. In a pledge to reduce total energy consumption, Ophelia will be donating 10% of the proceeds from the evening to GreenHomeNYC, an organization dedicated to promoting energy efficient and sustainable built environments to promote green professional development in NYC. Ophelia is set 26-stories above the city bustle and offers 360-degree views of the East River and Manhattan skyline. The lounge thoughtfully layers design elements from the 1920s and 30s, offering a perfect backdrop for intimate gatherings over light-bites and signature cocktails. To celebrate Earth Day at Ophelia, visit opheliany.com/reservation.
