REHEATING INSTRUCTIONS

Individual Turkey Dinner

Open the clamshell container. Remove the cranberry sauce and set aside. Pour the gravy over the turkey. Close the container and reheat in the microwave for 3 to 6 minutes depending on your oven. Allow it to cool slightly before opening to allow steam to escape.

2-Packs and 4-Packs of Turkey

The aluminum pan is ready to be placed in the oven; cranberry sauce and gravy for the turkey are in separate containers. Place the aluminum pan on a sturdy pan and place in the oven. Reheat at 325-350 degrees for 30 to 60 minutes until the internal temperature reaches 160 degrees with a probe thermometer. Remove the pan from the oven. **BE CAREFUL!** Please note there is a sheet of plastic film under the lid to keep your food moist. Remove the aluminum lid. Be extremely careful not to burn your fingers by the escaping steam. Wear oven mitts. Use a fork to puncture the plastic before removing. Put the gravy in a pot or microwave proof container and heat on the stove top on low flame or in the microwave.

REHEATING OTHER FOODS

2-Pack Meals

Two packs are packaged in microwaveable plastic containers. Your entree is fully cooked and depending on the time it is picked up, it will be warm but not hot. Reheating may be required. Reheat in the microwave for 3 to 6 minutes depending on your oven.

Family Packs for 4, Full and Half Sized Catering Orders

Place the aluminum pan on a sturdy pan and place in the oven. Reheat at 325-350 degrees for 30 to 60 minutes until the internal temperature reaches 160 degrees with a probe thermometer. Remove the pan from the oven. **BE CAREFUL!** Please note there is a sheet of plastic film under the lid to keep your food moist. Remove the aluminum lid. Be extremely careful not to burn your fingers by the escaping steam. Wear oven mitts Use a fork to puncture the plastic before removing

Notes and Recommendations

- All food has been seasoned with a moderate amount of seasoning. Taste all dishes prior to adjusting seasoning to your particular liking.
- Aluminum pans can be stacked on top of each other to save space in oven.
- All food in aluminum packaging has plastic film sheets placed on top of the food.
- All foods can be reheated in microwave oven.
- Aluminum pans cannot go in microwave oven.
- These instructions are meant to be a guideline, temperatures and length of cooking time will depend on type and calibration of your oven.
- We recommend that no food sits out for more than two hours or has an internal temperature of 40 - 140 degrees for more than two hours.
