

REIGN

At REIGN, our mission revolves around two core principles:
Sustainable wine practices and diversity.

We specialize in wines crafted with minimal intervention and sustainable methods that enhance soil health and vineyard vitality.

Our commitment to eco-friendly winemaking ensures that each bottle not only reflects our dedication to sustainability, but also offers a distinctive and superior taste experience.

In addition to our focus on sustainability, we champion diversity within the wine industry. By showcasing wines from diverse regions and highlighting talented and unique winemakers.

We strive to celebrate the richness and variety that the world of wine has to offer.

Through these dual commitments, we aim to deliver a wine experience that is not only exceptional in quality but also aligns with our values of sustainability and inclusivity.

Join us on a journey where every sip supports our belief in responsible practices and the diverse voices shaping the future of wine.

LEGEND

Organic Wine - is wine made from grapes grown in accordance with the principles of organic farming, which exclude the use of artificial chemical fertilizers, pesticides, fungicides, and herbicides.

Biodynamic Wine - are wines made employing the biodynamic methods both to grow the fruit and during the post-harvest processing. Biodynamic wine production uses organic farming methods (e.g., employing compost as fertilizer and avoiding most pesticides) while also employing soil supplements prepared according to Rudolf Steiner's formulas, following a planting calendar that depends upon astrological configurations, and treating the earth as a living and receptive organism.

Natural Wine - refers to a generalized movement among winemakers for production of wine using simple or traditional methods. Although there is no uniform definition of natural wine, it is usually produced without the use of pesticides or herbicides and with few or no additives. Typically, natural wine is produced on a small scale using traditional rather than industrial techniques and fermented with native yeast. In its purest form, natural wine is simply unadulterated fermented grape juice with no additives in the winemaking process. Other terms for the product include low-intervention wine, raw wine, and naked wine

Orange/Skin Fermented Wine - also known as skin-contact white wine, skin-fermented white wine, or amber wine, is a type of wine made from white wine grapes where the grape skins are not removed but stay in contact with the juice for days or even months, as is more typical with red wines. This contrasts with conventional white wine production, which involves crushing the grapes and quickly moving the juice off the skins into the fermentation vessel. The skins contain colour pigment, phenols and tannins that would normally be considered undesirable for white wines, while for red wines skin contact and maceration is a vital part of the winemaking process that gives red wine its colour, flavour, and texture.

ŔARE

Introducing the first of its kind in North America.
We proudly present our list of Rare Wines, a curated selection featuring a
diverse array of extraordinary wines.

With a focus on sourcing and serving wines of exceptional quality
and rarity, our concept revolves around creating an unparalleled dining
experience where guests can indulge in exceptional wines rarely
found elsewhere, including limited-production bottles,
vintage finds, and selections from renowned vineyards.

We invite you to immerse yourself in this exclusive collection and discover
the treasures we've meticulously procured for you. Whether you're a
connoisseur or an enthusiast, our Rare Wine List promises to delight and
inspire your palate with each sip.

Join us as we redefine the wine experience, offering you
the opportunity to savour the extraordinary and explore the exceptional.
