

## Private Dining F&B Options

### Private Dining Rooms

We have two rooms available at our Alpharetta location only. You can find room minimums, pictures, details and seating capacity for those by [Clicking Here](#)

### How does ordering food in the private dining rooms work?

We have a couple different options:

- We can create a pre-selected buffet, put together by our catering manager, based off your ideal budget.
- You and your Guests can order off our regular menu, the same way you would in our regular dining room.
- We can create a pre-fixed menu of select items for your guests to order from.
- Family style - this consists of sheet trays with 2-3 various meat options, big sides and salads for everyone to share.

### What about alcohol?

We have several options you can choose from:

- You and your Guests can order off our regular beer, wine and liquor menus with no restrictions.
- We can create a set menu for you and your Guests. This way Guests may only order from the set menu highlighting beers, wines and/or cocktails of your choosing.
  - *We can start separate tabs for those Guests who want to order something not listed on the set beverage list.*
- Drink Tickets - We can utilize a drink ticket system to limit Guest consumption.
  - Hosts can choose to do 1 ticket per drink
  - Once tickets are gone we can turn the event into a cash bar and allow guests to open a separate tab
  - Be sure to bring your own tickets. Loyal Q will *not* provide them

### Menus

You can view our main menu, catering menu and our current beers lists with the links below.

Our beers lists are updated in real time, so please be mindful these may change before your scheduled event. If there is a certain item you see you would like to have we can do our best to accommodate, but it is not always possible as our taps are constantly rotated and beers can be seasonal or on special release.
