## About The Mill Room

The Mill Room is located in the lower level of the Dew Drop Inn. The Dew Drop was originally built as a flour mill. In 1926 the flour mill shut down and converted into the Dew Drop Inn. In 2015 the new owners expanded the building creating a second restaurant called The Kozy and a venue space now called The Mill Room. The famous Mill Hill was named for having several mills located on the road and is the main street that runs through our town.

We are proud to honor its heritage with this name!

With over 90 years of history, our goal is to provide a place for families and friends to gather creating many more memories to come.

The Mill Room
