A **sleek new upscale restaurant with a florist** is now open in Wicker Park that also offers some seriously creative cocktails. The drinking highlight of Machine, from the owners of Headquarters Beercade, is interactive cocktails, four of which come with hammers used to break brûléed-like textures on the tops, as well as a flower pot-like large-format drink served in a “diamond” and a “shot fountain” with six wine shots. Food options include a burger with foie gras and braised pigtales.
