VIRGINIA’S $18.1 BILLION RESTAURANT ECONOMY IS AT RISK

Over 75% of Virginia’s 15,507 eating and drinking locations are in danger of closing permanently without The RESTAURANTS Act

THE RESTAURANTS ACT WOULD GENERATE $5.3 BILLION ECONOMIC BENEFIT FOR VIRGINIA

- Food services account for 7.7% of all employment in Virginia.
- Food services projected to contribute 39,729 new Virginian jobs from 2018 to 2028.
- The RESTAURANTS Act would galvanize Virginia’s tourism industry, encouraging travelers to eat in Virginia’s establishments and spend money on lodging, other tourist attractions, and retail, generating $2.2 billion.
- The RESTAURANTS Act would provide $404.5 million in benefits to countless other bakers, fishermen, butchers, and, of course, Virginia’s 39,850 small farms.

WITHOUT HELP FOR INDEPENDENT RESTAURANTS, VIRGINIA’S ECONOMY WILL SUFFER

- An estimated 76% of eateries are independently owned.
- Independent restaurants rely far less on pickup and drive through service. Fine and casual dining have declined 85% and 65% respectively, while fast-food has only decreased 21%. National chains like Domino’s, Pizza Hut, Papa John’s, Raising Cane’s, and Taco Bell have hired during this time.
- Nearly 65% of the revenue from local independent restaurants recirculates in the local economy compared to about 30% for chain restaurants.

THE RESTAURANTS ACT WOULD HELP PROTECT 423,400 VIRGINIA JOBS

- Since the beginning of March, the leisure and hospitality industry has accounted for 39% of all jobs lost in Virginia.
- Keeping many of Virginia’s 423,400 leisure and hospitality workers employed would save Virginia $739 million in unemployment benefits and insurance taxes.

• Nationwide, over **2.7 million leisure and hospitality workers are unemployed right now**, more than any other industry. Unemployment in **leisure and hospitality is over 277% higher** than it was at the same time last year.16

• The RESTAURANTS Act would **reduce the national unemployment rate by an estimated 2.4%**, a result of saving the industry that has been hit hardest by job losses from the outset of this pandemic.17

THE PAYCHECK PROTECTION PROGRAM DID NOT PROVIDE THE RELIEF NECESSARY FOR RESTAURANTS TO RECOVER

• Restaurants and accommodations received less than **$43 billion** from the Paycheck Protection Program, despite contributing over **five times that in losses to our GDP**.18

• Food services and drinking places reported a **18.8% unemployment rate in August** – more than double the nation’s aggregate unemployment rate of 8.5%.19

• An estimated **1 in 3 American restaurants will close by year end** without Congressional support. An estimated **8,000 restaurants** have already shuttered so far this year.20

CONGRESS CAN SAVE 16 MILLION JOBS NATIONWIDE AND GENERATE UP TO $271 BILLION IN TWO YEARS BY PASSING THE RESTAURANTS ACT.21

• Independent restaurants and bars **directly employ 11 million workers nationwide**. Additionally, **5 million more work in the industry’s vast supply chains** and rely on eating and drinking places to sustain their livelihoods.22 Without direct aid, all of these jobs are in danger of vanishing permanently.

• Restaurants have become tourist destinations domestically and internationally. One study found that **72% of all travelers choose their destination based on food and drink offering**.23 Tourists also spend money on travel, housing, and retail.

• The **loss of economic activity** due to culinary travelers is estimated to be up to **$141 billion**.24

• Restaurants are hubs of minority employment and advancement. **Sixty percent of all chefs nationwide are minorities.** Minorities also make up 53% of bussers, runners, baristas, prep-cooks, dishwashers and kitchen porters. Restaurants also employ more minority employee-managers than any other industry.25

• **Over half of all restaurant workers are women**, and restaurants employ over one million single mothers.26

• Restaurants generate middle class jobs at a rate **three times faster than the economy**.27
