VERMONT’S $1.1 BILLION RESTAURANT ECONOMY IS AT RISK

Over 75% of Vermont’s 1,413 eating and drinking locations are in danger of closing permanently without The RESTAURANTS Act

THE RESTAURANTS ACT WOULD GENERATE $401 MILLION ECONOMIC BENEFIT FOR VERMONT

- Food services account for 6.8% of all employment in Vermont.
- The RESTAURANTS Act would galvanize Vermont’s tourism industry, encouraging travelers to eat in Vermont’s establishments and spend money on lodging, other tourist attractions, and retail, generating $165 million.
- The RESTAURANTS Act would provide $29 million in benefits to countless other bakers, fishermen, butchers, and, of course, Vermont’s 6,170 small farms.

WITHOUT HELP FOR INDEPENDENT RESTAURANTS, VERMONT’S ECONOMY WILL SUFFER

- An estimated 76% of eateries are independently owned.
- Independent restaurants rely far less on pickup and drive through service. Fine and casual dining have declined 85% and 65% respectively, while fast-food has only decreased 21%. National chains like Domino’s, Pizza Hut, Papa John’s, Raising Cane’s, and Taco Bell have hired during this time.
- Nearly 65% of the revenue from local independent restaurants recirculates in the local economy compared to about 30% for chain restaurants.

THE RESTAURANTS ACT WOULD HELP PROTECT 36,600 VERMONTER JOBS

- Since the beginning of March, the leisure and hospitality industry has accounted for 48% of all jobs lost in Vermont.
- Keeping many of Vermont’s 36,600 leisure and hospitality workers employed would save Vermont $17.2 million in unemployment benefits and insurance taxes.

• Nationwide, over 2.7 million leisure and hospitality workers are unemployed right now, more than any other industry. Unemployment in leisure and hospitality is over 277% higher than it was at the same time last year.\textsuperscript{15}

• The RESTAURANTS Act would reduce the national unemployment rate by an estimated 2.4%, a result of saving the industry that has been hit hardest by job losses from the outset of this pandemic.\textsuperscript{16}

THE PAYCHECK PROTECTION PROGRAM DID NOT PROVIDE THE RELIEF NECESSARY FOR RESTAURANTS TO RECOVER

• Restaurants and accommodations received less than $43 billion from the Paycheck Protection Program, despite contributing over five times that in losses to our GDP.\textsuperscript{17}

• Food services and drinking places reported a 18.8% unemployment rate in August – more than double the nation’s aggregate unemployment rate of 8.5%.\textsuperscript{18}

• An estimated 1 in 3 American restaurants will close by year end without Congressional support. An estimated 8,000 restaurants have already shuttered so far this year.\textsuperscript{19}

CONGRESS CAN SAVE 16 MILLION JOBS NATIONWIDE AND GENERATE UP TO $271 BILLION IN TWO YEARS BY PASSING THE RESTAURANTS ACT.\textsuperscript{20}

• Independent restaurants and bars directly employ 11 million workers nationwide. Additionally, 5 million more work in the industry’s vast supply chains and rely on eating and drinking places to sustain their livelihoods.\textsuperscript{21} Without direct aid, all of these jobs are in danger of vanishing permanently.

• Restaurants have become tourist destinations domestically and internationally. One study found that 72% of all travelers choose their destination based on food and drink offering.\textsuperscript{22} Tourists also spend money on travel, housing, and retail.

• The loss of economic activity due to culinary travelers is estimated to be up to $141 billion.\textsuperscript{23}

• Restaurants are hubs of minority employment and advancement. Sixty percent of all chefs nationwide are minorities. Minorities also make up 53% of bussers, runners, baristas, prep-cooks, dishwashers and kitchen porters. Restaurants also employ more minority employee-managers than any other industry.\textsuperscript{24}

• Over half of all restaurant workers are women, and restaurants employ over one million single mothers.\textsuperscript{25}

• Restaurants generate middle class jobs at a rate three times faster than the economy.\textsuperscript{26}
