OHIO’S $24.2 BILLION RESTAURANT ECONOMY IS AT RISK

Over 75% of Ohio’s 22,547 eating and drinking locations are in danger of closing permanently without supporting The RESTAURANTS ACT

THE RESTAURANTS ACT WOULD GENERATE $5.2 BILLION IN ECONOMIC BENEFIT FOR OHIO

- Eating and drinking establishments account for 8.2% of all employment in Ohio.
- Restaurants generate a large portion of Ohio’s revenue. Accommodation and food services contributed 7.7% of the state’s sales tax in 2019.
- The RESTAURANTS Act would galvanize Ohio’s tourism industry, encouraging travelers to eat in Ohio’s establishments and spend money on lodging, other tourist attractions, and retail, generating $2.9 billion, the 6th largest increase in the nation.
- The RESTAURANTS Act would provide $525.9 million in benefits to countless other bakers, fishermen, butchers, and, of course, Ohio’s 69,800 small farms.

WITHOUT HELP FOR INDEPENDENT RESTAURANTS, OHIO’S ECONOMY WILL SUFFER

- An estimated 76% of eateries are independently owned.
- Independent restaurants rely far less on pickup and drive through service. Fine and casual dining have declined 85% and 65% respectively, while fast-food has only decreased 21%. National chains like Domino’s, Pizza Hut, Papa John’s, Raising Cane’s, and Taco Bell have hired during this time.
- Nearly 65% of the revenue from local independent restaurants recirculates in the local economy compared to about 30% for chain restaurants.

THE RESTAURANTS ACT WOULD HELP PROTECT 577,900 OHIOAN JOBS

- Since the beginning of March, the leisure and hospitality industry has accounted for 34% of all jobs lost in Ohio.

13 Ohio Economy at a Glance.
14 Ibid.
• Keeping many of Ohio’s 577,900 leisure and hospitality workers employed would save Ohio $930 million in unemployment benefits and insurance taxes.\textsuperscript{15}

• Nationwide, over 2.7 million leisure and hospitality workers are unemployed right now, more than any other industry. Unemployment in leisure and hospitality is over 277\% higher than it was at the same time last year.\textsuperscript{16}

• The RESTAURANTS Act would reduce the national unemployment rate by an estimated 2.4\%, a result of saving the industry that has been hit hardest by job losses from the outset of this pandemic.\textsuperscript{17}

THE PAYCHECK PROTECTION PROGRAM DID NOT PROVIDE THE RELIEF NECESSARY FOR RESTAURANTS TO RECOVER

• Restaurants and accommodations received less than $43 billion from the Paycheck Protection Program, despite contributing over five times that in losses to our GDP.\textsuperscript{18}

• Food services and drinking places reported a 18.8\% unemployment rate in August – more than double the nation’s aggregate unemployment rate of 8.5\%.\textsuperscript{19}

• An estimated 1 in 3 American restaurants will close by year end without Congressional support. An estimated 8,000 restaurants have already shuttered so far this year.\textsuperscript{20}

CONGRESS CAN SAVE 16 MILLION JOBS NATIONWIDE AND GENERATE UP TO $271 BILLION IN TWO YEARS BY PASSING THE RESTAURANTS ACT.\textsuperscript{21}

• Independent restaurants and bars directly employ 11 million workers nationwide. Additionally, 5 million more work in the industry’s vast supply chains and rely on eating and drinking places to sustain their livelihoods.\textsuperscript{22} Without direct aid, all of these jobs are in danger of vanishing permanently.

• Restaurants have become tourist destinations domestically and internationally. One study found that 72\% of all travelers choose their destination based on food and drink offering.\textsuperscript{23} Tourists also spend money on travel, housing, and retail.

• The loss of economic activity due to culinary travelers is estimated to be up to $141 billion.\textsuperscript{24}

• Restaurants are hubs of minority employment and advancement. Sixty percent of all chefs nationwide are minorities. Minorities also make up 53\% of bussers, runners, baristas, prep-cooks, dishwashers and kitchen porters. Restaurants also employ more minority employee-managers than any other industry.\textsuperscript{25}

• Over half of all restaurant workers are women, and restaurants employ over one million single mothers.\textsuperscript{26}

• Restaurants generate middle class jobs at a rate three times faster than the economy.\textsuperscript{27}
